- ◆ 541614 Process, Physical Distribution, and Logistics Consulting Services
- ◆ 541618 Other Management Consulting Services
- ◆ 541990 All Other Professional, Scientific, And Technical Services

## Past Performance

### **Internal Revenue Service (IRS)**

As a subcontractor, from 2015 – 2018, NHS worked with our Prime to provide program and project management, requirements elicitation, documentation, visualization, and validation services for the Foreign Account Tax Compliance Act (FATCA) Program at the IRS. Working with our Prime, we successfully completed requirements activities and deliverables for five separate releases across four systems and were responsible for the project's requirements lifecycle throughout the Agile Software Development Life Cycle (SDLC) approach for three separate streams of development. Leveraging User Experience techniques, specialized facilitation skills, rapid visualization, and Agile expertise, the team helped the business, end users, and IT staff gain alignment on requirements and screen designs before any code was written. These requirements efforts resulted in enhanced clarity amongst all stakeholders, leading to minimal rework throughout development sprints.

### **Federal Aviation Administration (FAA)**

As a subcontractor, from 2018 – present, NHS has worked with our Prime to provide business process re-engineering and risk management services. Working with our Prime, we documented the spend plan processes and procedures and identified inefficiencies. Through ongoing collaboration with the client, we successfully re-engineered the spend plan creation process to clearly identify and define the traceability between the original baselined cost estimate and the spend plan. This allowed the client to successfully report accurate numbers external to the Program. In addition, NHS has led the risk management process for the Program. NHS works with our client to define and document risks, issues, and/or opportunities that may impact the program.

## Contract Vehicles

- ◆ Federal Agencies can procure from Nash Harbor Solutions through Simplified Acquisition Procedures (SAP), and Government Purchase Cards.
- ◆ 8(a) set-aside and 8(a) ANC sole source awards.
- ◆ As a partner to our joint venture, Next Intelligence Solutions, Federal Agencies can procure from Nash Harbor Solutions through 8(a) STARS III and eFAST.
